THERMAL INSULATION COVERS

TIDL insulation covers are the leading brand of purpose designed reusable covers offering excellent insulation benefits for a wide variety of equipment including valves, flanges, calorifiers, strainers, separators, actuators, heat exchangers, elbow bends, pumps, etc.

This hugely popular and effective product has been independently tested and certified to the stringent Class 'O' Building Regulation British Standard, conforming to BS 476 part 6 (fire propagation) and part 7 (Class 1 rating awarded for surface spread of flame)

- Superb savings on energy bills
- Personnel protection from heat fatigue and possible skin burns
- Extremely easy fitting and quick removal for maintenance
- Covers are completely reusable
- Class 'O' certification
- Rapid pay-back/savings time
- Made from heat-resistant materials to withstand temperatures of up to 250°C/482°F (higher resistant covers available)
- Special covers available where acidic resistance required
- Safe to touch
- Drawstrings for effective end closure, where necessary
- Water repellent
- Protection against frost damage
- Competitively priced
- Manufactured in Ireland

BARREL INSULATION JACKETS

The prestigious TIDL BML barrel insulation jackets offer excellent insulation benefits for the barrels of injection machines, blow moulders, extruders, extruder heads and lip dies, etc.

This specialist insulation product can offer superb savings of up to 40% on barrel heating and is manufactured with the support of over 25 years of experience, so quality is guaranteed.

- Savings of between 25-40% on energy bills
- Personnel protection from heat fatigue and possible skin burns
- Easy fitting and removal for maintenance
- Quicker start-up time
- Extended heater band life
- Rapid pay-back/savings time
- Safe to touch
- Jackets reduce Peaks and total metered heat energy load
- Made from heat-resistant materials
- Jackets resist steady temperatures of around 350°C/662°F with temporary peaks of approximately 450°C/842°F (higher resistant jackets available upon request)
- Cut-outs for junction boxes and thermocouples
- Competitively priced
- Manufactured in Ireland

Can achieve up to 40% Energy Savings!
